10:15 – 12:15 PM	“Character Education”
12:15 – 1:00 PM	Lunch by Creekside Catering
1:00 – 3:00 PM	“Mealtime Fun”

### Workshop Sessions

#### **“The Little STEAM Engines that Could”** (KCF: II.B, CDA: 2)

Discover why STEAM is more than an acronym. It is an integrated way of teaching children or all ages the concepts of science, technology, engineering, art, and mathematics. Learn how STEAM fosters and uses children’s higher order thinking skills: problem-solving, observation, communication, critical thinking, reasoning, teamwork, and creativity. Explore natural, simple, and fun ways to incorporate STEAM into your program through hands-on stations, from water activities and magnets to mosaics and outdoor play. Cultivate wonder through STEAM, creating a foundation of learning for school and lifelong success and an attitude that, “I think I can!” \*This class includes a make & take!

#### **“Character Education”** (KCF: II.C, CDA: 3)

Discover why character education is essential for children’s development. Character education is an intentional approach to teaching children about human values and morals such as kindness, respect, responsibility, fairness, honesty, and courage. Fred Rogers said, “There is something of yourself that you leave at every meeting with another person.” High quality character education emphasizes human interactions, boosting children’s social, emotional, cognitive, and ethical development and creating positive and inclusive environments. Explore simple ways to incorporate character education in your program to foster their problem-solving, decision-making, and communication skills and give them skills that will last a lifetime. \*This training meets the annual child development/behavior guidance requirement for family child care\*

#### **“Mealtime Fun”** (KCF: VII.C, CDA: 1)

Bring your inner chef (and appetite) to explore activities, strategies, and foods to create fun mealtimes with children. Learn how setting healthy eating and table habits now will make a difference throughout their lives. We’ll discuss simple ways to make ordinary foods seem extraordinary, from the words you use to the arrangements on the plate. Discover ways to work with picky eaters and accommodate dietary restrictions. Explore and prepare many unique, fun, and inexpensive foods that are sure to become favorites with the children in your care—and you—in this hands-on training.

*Hollee (M.A. Early Childhood) has been a licensed family childcare provider for 14 years and provides trainings and resources for early childhood professionals. She has worked for more than 25 years with children of all ages as a teacher, assistant teacher, and director in myriad schools and programs, promoting play and child-directed learning. When Hollee's not caring for children, presenting trainings, designing websites, or advocating for early childhood, she loves spending time with her family, playing board games and cards, volunteering, and baking.*
